Employee Management System

A full-stack application for managing employee records, including features to add, view, edit, and delete employees.

Features

- **Frontend:** React-based user interface with pages for listing, adding, editing, and viewing employee details.

- **Backend:** Node.js with Express, MongoDB for data storage.

- **API Endpoints:** RESTful APIs for employee CRUD operations.

- **Database Schema:** Defined with Mongoose.

Project Setup

Prerequisites

- Node.js and npm installed.

- MongoDB installed and running locally or via a cloud service.

Installation

1. Clone the repository:
   ```bash
   git clone https://github.com/your-repo/employee-management-system.git
   cd employee-management-system
